**Subject:** FW: COMMENTS / SUGGESTIONS FOR DRAFT BUDGET SUMMIT: NPO/ NGO SECTOR / CWP

Sorry Ms. Arendse

Ms. Smal reminded me that I forgot to add looking at a budget to eliminate the pit toilets system in Tesselaarsdal. It is still used by youngsters and the Elderly.

Regards

Stephen Young

Good day Sir,

Thank you for submitting comments on the draft IDP and Budget.

Your comments and recommendations will be forwarded to the relevant departments, after which I am sure you will receive a consolidated response from the office of the MM.

Kind Regards

**Subject:** COMMENTS / SUGGESTIONS FOR DRAFT BUDGET SUMMIT: NPO/ NGO SECTOR / CWP

Good Day

Following your very positive feedback please see suggestions for draft budget below as requested. I have added a number of items.

Regards

Stephen Young

LRC for CWP Tesselaarsdal

Good day All,

Thank you for the comments, we are in the final stage of the draft IDP review which leaves little to almost no room to discuss the points applicable to the IDP as mentioned below. However all is not lost.

The inputs are valued and we always encourage communities to get involved in our process and planning, for this reason I want to urge Mr Young to please resubmit the comments/proposals during the formal draft IDP/budget comment period, between March and April. We will then formally respond on the proposals after council and management had a chance to look and discuss the proposals .

Trust you find this in order.

Regards

Verohne

Dear Ms. Kilowan

I would like to submit points regarding Tesselaarsdal and areas we should consider when drawing up an IDP and future plans for Tesselaarsdal

1. The RDP houses in the spruit where no human washing / hygiene facilities were installed ever. Shower / bath or hot water.
2. Flisp / first time buyers housing assistance be given. Youngster wanting to purchase ground. Educational workshops.
3. Tourism assistance / training for historical resident to become owners of the tourism future and not only "workers" as we tend to make poorer people.
4. Assistance with registration of property from deceased family members name into living residents name. Present historical debt is a huge stumbling block. This will reduce your debtors. Three data cleansing attempts have still not helped much. (CWP can assist and we have a service provider who is willing to assist. He helped on the Biggest Deal)
5. A permanent solution to the tax / rebate issue to protect the traditional coloured community from skyrocketing property valuations and tax issues.
6. A solution to the rising migrant population brought in by lifestyle farmers and to look at the future housing needs and possibility of future squatter camp management.

7. A solution to the smell of the closed circuit turnkey sewage system in the RDP settlement. This has been plagued by problems from day one. I was onsite during the start up process and became aware of the design faults. Some were that there was less sewage produced than calculated for. Stop gap solution was to brick holding tank in to reduce holding capacity. Another incorrect calculation was the amount of washing machine after entering the system which dilutes the sewage sludge. (The actual engineer had passed away on the project and a family member ran the project.
8. The completion of the storm / flood channel running behind the RDP (Die Spruit) housing scheme. The channel down the side of properties 282/285/245 of 811 still need to be completed.
9. The completion of Tesselaarsdal sports field and change rooms.
10. A shelter / "afdak" for the clinic combi in Bethoeskloof as everyone now sits outside in the rain or sun.
11. A container / room / for gym equipment we have on hand already. On the side of library which is TWK property would be great. We would like a youngster to manage it and maybe turn it into a small business.
12. A business hub with training be set up for tourism training for historical resident. Lifestyle farmers are taking over ownership of that unique history and making the people who still live the consequences of that history into "workers with jobs" or mostly employing migrants instead of making our youngsters small business owners selling their own history. (Example the Haarkapper walked a route from Tessies to Stanford and back to cut hair using a flashlight to light his way. Very romantic as we sell it around guest houses here now, but he walked because he never had a MTB of R100000 or a Discovery 4 x 4 that was in for service. Apartheid made and kept him poor. The real reason he did it is far more interesting and a testament to his character and to never giving up on a goal.
13. A very small business hub for a CWP office where CWP can place their computer / printer / scanner and files. Small offices would be great so we can have kids running small businesses there, hair salon, nails small scale bakery etc.
14. A small fund for a CWP committee's traveling costs so CWP and TWK can sit and plan projects. CWP as I have suggested are able and willing to assist TWK in many ways. (Assisting with training regarding TWK services, contact people, information distribution. A fund to assist LRC members to travel to Grabouw for LRC meetings. A fund so a member or members of TWK can attend these important meetings. TWK representation is not good at all. This seriously hampers CWP's effectiveness in the TWK area.
15. Litter drums around the two shopping areas in Tesselaarsdal.
16. The upgrading of the domestic water system over time as this system was designed as a "self-help" mix and match system which was brilliant and served its purpose well. Now lifestyle farmers and the higher income group are putting pressure on the system it was not designed for.

I trust it will be of interest and benefit. We will also be engaging with TWK as in the past and further build on our positive relationship. This will be driven by CWP as it has contributed enormously to Tesselaarsdal. We as CWP also have information sessions with Club Thessalonica, talk to random people including the youth, people released from prison, and people at the Creche.

Kind Regards
